Reviving the Past: Compendium of all Evidence Covid Vaccines are Bad

The past tends to haunt us whether we like it or not.

Ineffectiveness of Vaccines
- Covid vaccine has zero effectiveness ([UK study](#), [Czech study](#), [Canada study](#))
- [Vaccines have been misattributed as ending many diseases, when actually all that ended them was better public health practices.](#)
- flu vaccine has no effect second dose ([source 1](#), [source 2](#), [source 3](#))
- [covid doesn't help stop hospitalization.](#)

most vaccines end up not getting past trials
- [Study: The probability of vaccines progressing from phase 2 to licensure within 10 years was 10.0%](#)
- [Study – most vaccine development programs fail](#)
- [Vaccines in phase 1 only have 12% chance of receiving regulatory approval in 12 years.](#)

Covid "Trials" did not test for safety

- japanese researchers find long term heart problems
- COVID vaccines linked to increases in heart, brain, blood disorders: study
- increases of Myocarditis and pericarditis, Acute disseminated encephalomyelitis, Cerebral venous sinus thrombosis, Guillain-Barré syndrome
- Covid vaccine causes changes in heart (article; study: Assessment of Myocardial 18F-FDG Uptake at PET/CT in Asymptomatic SARS-CoV-2–vaccinated and Nonvaccinated Patients Takehiro Nakahara)

Proof Vaccines do more harm than good
- Population study definitively proving vaccines hurt youth more than they help them (Spiro Pantazatos, Herve Seligmann, COVID vaccination and age-stratified all-cause mortality risk, October 2021)
- Second population study showing vaccines have done more harm (link to article; the actual research: Spatiotemporal variation of excess all-cause mortality in the world (125 countries) during the Covid period 2020-2023 regarding socio economic factors and public-health and medical interventions)
- Third population study shows vaccines have done average harm (link to article; the actual research: COVID-19 vaccine-associated mortality in the Southern Hemisphere Denis G. Rancourt; Marine Baudin; Joseph Hickey; Jérémie Mercier)
- New Zealand data definitively proving vaccines do more harm than good (from Steve Kirsch)
- 33% decline in successful conception in covid vaxxed women compared unvaccinated women.

Changing DNA:
- Yes, I know the vaccines were intended to only change RNA, and not DNA.
- Yale University scientists have found Covid spike protein in the blood of people who received Covid mRNA shots - up to two years after they received the jabs. The people were never infected with Covid
- Swedish study found that the Pfizer vaccine goes into liver cells and converts to DNA
- SARS-CoV-2 RNAs can be reverse transcribed into dna (article; study: SARS-CoV-2 RNA reverse-transcribed and integrated into the human genome Liguo Zhang)

Masks are ineffective:

- List Of 30 Studies Showing Face Masks Are Useless Against COVID-19

Did you enjoy reading that? I certainly did not enjoy writing it lol.
